

## Wood Finishing Solutions

A full line of applicators and spray packages for wood applications

Whether you are sealing, painting, staining or adhering,  
Graco's wood finishing equipment will suit your application!

- Designed for superior performance and reliability
- Product solutions for each stage of the wood finishing process
- Deliver material while increasing efficiency and finish quality

PROVEN QUALITY. LEADING TECHNOLOGY.

## Stain Applications

NGR and non-dye stains should be applied at low pressures due to the viscosity of the materials. Below are recommendations for low pressure equipment which will apply material with the consistency required to best enhance the wood's color.

**AirPro Spray Gun**  
Part #: 289109

- Conventional spray
- Pressure feed
- 0.040" nozzle

Improved transfer efficiency through reduced air consumption

Ergonomically designed for improved operator comfort

Available in HVLP (289110) and compliant (289111)

**AirPro Spray Gun**  
Part #: 289011

- Conventional spray, gravity feed
- 0.055" nozzle
- Includes 23 oz plastic cup

Improved transfer efficiency through reduced air consumption

Ergonomically designed for improved operator comfort

Available in HVLP (289014) and compliant (289017)

**Finex™ Spray Gun**  
Part #: 289244

- Conventional spray, gravity feed
- 0.055" nozzle
- Includes 20 oz plastic cup

Superior value air spray gun

3M™ PPS™ cup compatible

Available in HVLP (289239)

**Mini Finex Spray Gun**  
Part #: 289259

- HVLP, gravity feed
- 0.047" nozzle
- Includes 4 oz plastic cup

Superior value air spray gun

3M™ PPS™ cup compatible

Optional glaze nozzle (24F733) available

**Triton Air Spray Package**  
Part #: 289642

- 100 psi fluid and air pressure
- AirPro HVLP spray gun
- Pail mount, stainless steel pump

Double diaphragm design for smooth changeover and low pulsation

Quick and easy flushing reduces material waste

Available with conventional (289644) or compliant (289643) AirPro gun

Aluminum pump available with conventional (289647), HVLP (289645), or compliant (289643) AirPro gun

**Triton Air Spray Package**  
Part #: 289635

- 100 psi fluid and air pressure
- AirPro HVLP spray gun
- Cart mount, stainless steel pump

Double diaphragm design for smooth changeover and low pulsation

Quick and easy flushing reduces material waste

Available with conventional (289637) or compliant (289636) AirPro gun

Aluminum pump available with conventional (289640), HVLP (289638) or compliant (289639) AirPro gun

**2.5 Gallon Pressure Tank**  
Part #: 223833

- Aluminum construction
- Up to 50 psi

Dual regulators provide convenient fluid and air control

Available with single regulator (171226)

**Pressure Cup**  
Part #: 239803

- Stainless steel construction
- 1 quart capacity

Dual regulators provide convenient fluid and air control

Available with single regulator (239802)

## Top Coat Applications

Top coats and sealers are generally applied with medium pressure equipment due to the mil thickness required for a high quality finish. Air assisted equipment will deliver optimal flow rates while maximizing transfer efficiency and increasing productivity.

**G15 AA Spray Gun**  
Part #: 24C853

- Air-assisted
- HVLV compliant
- Up to 1500 psi

Enhanced tip design provides uniform atomization and improved finish quality

Lightweight and low trigger pull for improved operator comfort

**Merkur Spray Package**  
Part #: G15C09

- 15:1 air-assisted pump, 0.4 gpm
- G15 AA gun
- 25 ft hose set

Pump outlet filter improves material cleanliness for enhanced spray performance

Easy flush pump lower allows fast color change and reduced solvent usage

Wall mount version also available (G15W07)

**Merkur ES Spray Package**  
Part #: 24F151

- 15:1 air-assisted pump
- G15 AA gun
- 25 ft hose set

Quick flush pump reduces material and solvent usage

Wall mount (24F150) and stainless steel stand (24F159) and wall (24F158) versions also available

**5 Gallon Pail Mount Agitator**  
Part #: 243340

- Stainless steel agitator
- Stainless steel pail cover
- 1/4 HP air driven motor

Carbon steel 5 gallon pail cover with stainless agitator also available (226086)

## Adhesive Applications

Adhesive applications vary in requirements from a bead of material to a full spray pattern. Low pressure equipment will assist in delivering the adhesive to the wood.

**AirPro Spray Gun**  
Part #: 288982

- Conventional spray
- Pressure feed
- 0.051" nozzle

Unique aircap designed for spraying adhesive

Ergonomically designed for improved operator comfort

**AirPro Pressure Tank Packages**  
Part #: 24C828

- AirPro adhesive spray gun
- 2.5 gallon aluminum pressure pot
- 25 foot hose set

Dual regulators provide convenient fluid and air control
